

System Requirements

To use PraxiLabs on your Laptop, Desktop Computer or Tablet/Smartphone, you will need the following:

Laptop/Computer:

- **Processor:** Core i3 Processor or above
- **Memory:** 4GB or above with 1.5 GB free memory
- **Graphics:** A Graphics Card with 512MB dedicated memory or higher.

Touch Devices:

- **Android:** Any modern Android device is supported
- **iOS:** Coming Soon

Internet:

- A reliable internet connection is required to load any experiment. Your internet speed determines the speed of loading, once an experiment is loaded no further internet usage is necessary unless using provided multimedia files [Videos/Documents].
- Your session remains open and the experiment remains loaded and (re)usable until you choose to reload the experiment or close your browser/ experiment page.

Operating System:

- Microsoft Windows
- MacOS
- Make sure to use the latest version of your OS and keep it updated

Browser:

- Safari
- Firefox
- Chrome
- Or any WebGL supported browser
 - Check if your browser supports WebGL. Use the following link: <https://get.webgl.org/> and make sure WebGL is enabled. If your browser doesn't support WebGL, please download the latest version of Safari/Firefox/Chrome/Edge.
- Make sure to use the latest version of your browser and keep it updated
